

Acrylic Spas

Rigo Spa offers a wide range of acrylic spas for both the domestic and commercial market providing a full design, manufacture, installation and maintenance service. These spas are lowered into a bund tank in a structural floor to perfectly blend into their surroundings. The combination of heat, massage and buoyancy delivers a sensation that relaxes the mind and body, and also heals muscles. With strategically placed water jets, each model offers supreme therapeutic support.

Product features: -

- Various shell colours available (colour chart available on request),
- Self supporting steel structure with full spray foam insulation,
- Shell fittings installation to suit client's requirements – returns, suction, jets, air nozzles etc...
- 50w underwater light with option to use LED lighting
- Air venturi and control system

Various optional extras are available with these products such as additional water and air massage features and colour changing lighting effects.

Deck Level Spa range (with overflow channel and grating)

2m square, 2.25m octagonal, 2.35m round, 2.3m square, 3m round, 2.5m x 3.8m octagonal as standard. Many more shell options are available upon request.
